Subject Index of Volume 132

Ageing
  the effect of ageing and creep on the impact properties of type 316 weld metals, L1
Alloys
  atomic ordering in Ti–V–Al shape memory alloys, 237
  dendrite spacings in directionally solidified superalloy PWA-1480, 195
  effect of microstructure on the mechanical properties of an Al alloy 6061–SiC particle composite, 83
  fracture toughness characterization of a weldment in a microalloyed steel using resistance curves, 153
  internal friction associated with formation and dissolution of metastable phase particles as grain boundaries in Al–Mg alloys, 225
  on the tempered martensite embrittlement in AISI 4140 low alloy steel, L5
  shock consolidation of Al–Li alloy powders, 257
  structure of martensite in Co–W alloys, 267
Aluminium
  a differential scanning calorimetry investigation of the effects of zinc and copper on solid state reactions in Al–Zn–Mg–Cu alloys, 135
  an analysis of the effect of residual stresses on deformation and damage mechanisms in Al–SiC composites, 31
  atomic ordering in Ti–V–Al shape memory alloys, 237
  effect of microstructure on the mechanical properties of an Al alloy 6061–SiC particle composite, 83
  internal friction associated with formation and dissolution of metastable phase particles as grain boundaries in Al–Mg alloys, 225
  microstructure of α-Al base matrix and SiC particulate composites, 171
  phase transformation in a duplex Fe–Mn–Al–C alloy, 161
  precipitation and excess solid solubility in Mg–Al–Zr and Mg–Zn–Zr processed by spray atomization and deposition, 119
  shock consolidation of Al–Li alloy powders, 257
  the effects of temperature and strain rate on extended ductility of aluminum, 97
  wetting characteristics and interfacial reaction of liquid aluminium on hot-pressed boron nitride substrate, 277
  yielding and work hardening behaviour of titanium aluminides at different temperatures, 49
Amorphous zones
  identification of amorphous zones in the GeTeSb system, 273
Antimony
  identification of amorphous zones in the GeTeSb system, 273

Beryllium
  synthesis and properties of a low density, high porosity lithium hydride–beryllium hydride foam, 143

Boron
  wetting characteristics and interfacial reaction of liquid aluminium on hot-pressed boron nitride substrate, 277

Carbon
  effect of microstructure on the mechanical properties of an Al alloy 6061–SiC particle composite, 83
  microstructure of α-Al base matrix and SiC particulate composites, 171
  morphological and compositional changes of the carbides in Cr–Mo–V ferritic steel, 203
  phase transformation in a duplex Fe–Mn–Al–C alloy, 161
Cementite
  the growth of holes in plates of cementite, 213
Ceramics
  elastic modulus determination of coating layers as applied to layered ceramic composites, 39
Chromium
  microstructure and mechanical properties of Laves-phase alloys based on Cr_2Nb, 61
  morphological and compositional changes of the carbides in Cr–Mo–V ferritic steel, 203
Coatings
  elastic modulus determination of coating layers as applied to layered ceramic composites, 39
Cobalt
  structure of martensite in Co–W alloys, 267
Composites
  an analysis of the effect of residual stresses on deformation and damage mechanisms in Al–SiC composites, 31
  elastic modulus determination of coating layers as applied to layered ceramic composites, 39
  microstructure of α-Al base matrix and SiC particulate composites, 171
Compositional changes
  morphological and compositional changes of the carbides in Cr–Mo–V ferritic steel, 203
Compression
  orientation splitting of cube-oriented face-centred cubic crystals in plane strain compression, 245
Copper
  a differential scanning calorimetry investigation of the effects of zinc and copper on solid state reactions in Al–Zn–Mg–Cu alloys, 135
  cyclic strain localization in polycrystalline copper at room temperature and low temperatures, 67
  the erosion of copper by reflected sandblasting grains, 231
Crack growth
  characterization of small crack growth in 12% CrMoV steel under high temperature, low cycle fatigue conditions, 89
Creep
  the effect of ageing and creep on the impact properties of type 316 weld metals, L1

Chromium
characterization of small crack growth in 12% CrMoV steel under high temperature, low cycle fatigue conditions, 89
Crystals
orientation splitting of cube-oriented face-centred cubic crystals in plane strain compression, 245
Cyclic strain
cyclic strain localization in polycrystalline copper at room temperature and low temperatures, 67

Damage
an analysis of the effect of residual stresses on deformation and damage mechanisms in Al–SiC composites, 31
Deformation
an analysis of the effect of residual stresses on deformation and damage mechanisms in Al–SiC composites, 31
Dendrites
dendrite spacings in directionally solidified superalloy PWA-1480, 195
Deposition
precipitation and excess solid solubility in Mg–Al–Zr and Mg–Zn–Zr processed by spray atomization and deposition, 119
Differential scanning calorimetry
a differential scanning calorimetry investigation of the effects of zinc and copper on solid state reactions in Al–Zn–Mg–Cu alloys, 135

Erosion
the erosion of copper by reflected sandblasting grains, 231

Fatigue
characterization of small crack growth in 12% CrMoV steel under high temperature, low cycle fatigue conditions, 89
Fracture toughness
fracture toughness characterization of a weldment in a microalloyed steel using resistance curves, 153
Friction
internal friction associated with formation and dissolution of metastable phase particles as grain boundaries in Al–Mg alloys, 225

Gallium
high temperature transmission electron microscopy and X-ray diffraction studies of twinning and the phase transition at 145 °C in $LaGaO_3$, 13
synchrotron X-ray topography studies of twinning and the phase transition at 145 °C in $LaGaO_3$ single crystals, 23
Germanium
identification of amorphous zones in the GeTeSb system, 273

Hydrogen
synthesis and properties of a low density, high porosity lithium hydride–beryllium hydride foam, 143

Impact properties
the effect of ageing and creep on the impact properties of type 316 weld metals, L1

Interfacial reactions
wetting characteristics and interfacial reaction of liquid aluminium on hot-pressed boron nitride substrate, 277
Iron
phase transformation in a duplex Fe–Mn–Al–C alloy, 161

Lanthanum
high temperature transmission electron microscopy and X-ray diffraction studies of twinning and the phase transition at 145 °C in $LaGaO_3$, 13
synchrotron X-ray topography studies of twinning and the phase transition at 145 °C in $LaGaO_3$ single crystals, 23
Laves-phase alloys
microstructure and mechanical properties of Laves-phase alloys based on Cr_2Nb, 61
Layers
elastic modulus determination of coating layers as applied to layered ceramic composites, 39
Lead
slip on {111} planes in lead sulphide, 77
Liquid metal droplets
heterogeneous nucleation of solidification in atomized liquid metal droplets, 107
Lithium
shock consolidation of Al–Li alloy powders, 257
synthesis and properties of a low density, high porosity lithium hydride–beryllium hydride foam, 143

Magnesium
a differential scanning calorimetry investigation of the effects of zinc and copper on solid state reactions in Al–Zn–Mg–Cu alloys, 135
internal friction associated with formation and dissolution of metastable phase particles as grain boundaries in Al–Mg alloys, 225
precipitation and excess solid solubility in Mg–Al–Zr and Mg–Zn–Zr processed by spray atomization and deposition, 119
Manganese
phase transformation in a duplex Fe–Mn–Al–C alloy, 161
Martensite
structure of martensite in Co–W alloys, 267
Mechanical properties
effect of microstructure on the mechanical properties of an Al alloy 6061–SiC particle composite, 83
microstructure and mechanical properties of Laves-phase alloys based on Cr_2Nb, 61
Microstructure
effect of microstructure on the mechanical properties of an Al alloy 6061–SiC particle composite, 83
microstructure and mechanical properties of Laves-phase alloys based on Cr_2Nb, 61
microstructure of α-Al base matrix and SiC particulate composites, 171
Molybdenum
characterization of small crack growth in 12% CrMoV steel under high temperature, low cycle fatigue conditions, 89
morphological and compositional changes of the carbides in Cr–Mo–V ferritic steel, 203
Morphological changes
morphological and compositional changes of the carbides in Cr–Mo–V ferritic steel, 203

Niobium
microstructure and mechanical properties of Laves-phase alloys based on Cr_2Nb, 61
Nitrogen
wetting characteristics and interfacial reaction of liquid aluminium on hot-pressed boron nitride substrate, 277

Orientation splitting
orientation splitting of cube-oriented face-centred cubic crystals in plane strain compression, 245
Oxygen
high temperature transmission electron microscopy and X-ray diffraction studies of twinning and the phase transition at 145 °C in $LaGaO_3$, 13
synchrotron X-ray topography studies of twinning and the phase transition at 145 °C in $LaGaO_3$ single crystals, 23

Phase diagrams
planetary ball-milling: an experimental parameter phase diagram, 181
Phase particles
internal friction associated with formation and dissolution of metastable phase particles as grain boundaries in Al–Mg alloys, 225
Phase transformation
phase transformation in a duplex Fe–Mn–Al–C alloy, 161
Phase transitions
high temperature transmission electron microscopy and X-ray diffraction studies of twinning and the phase transition at 145 °C in $LaGaO_3$, 13
synchrotron X-ray topography studies of twinning and the phase transition at 145 °C in $LaGaO_3$ single crystals, 23
Powders
shock consolidation of Al–Li alloy powders, 257
Precipitation
precipitation and excess solid solubility in Mg–Al–Zr and Mg–Zn–Zr processed by spray atomization and deposition, 119

Residual stresses
an analysis of the effect of residual stresses on deformation and damage mechanisms in Al–SiC composites, 31
Resistance curves
fracture toughness characterization of a weldment in a microalloyed steel using resistance curves, 153

Sandblasting
the erosion of copper by reflected sandblasting grains, 231
Shock
shock consolidation of Al–Li alloy powders, 257
Silicon
an analysis of the effect of residual stresses on deformation and damage mechanisms in Al–SiC composites, 31
effect of microstructure on the mechanical properties of an Al alloy 6061–SiC particle composite, 83
microstructure of α-Al base matrix and SiC particulate composites, 171
Solid state reactions
a differential scanning calorimetry investigation of the effects of zinc and copper on solid state reactions in Al–Zn–Mg–Cu alloys, 135
Solidification
heterogeneous nucleation of solidification in atomized liquid metal droplets, 107
Solubility
precipitation and excess solid solubility in Mg–Al–Zr and Mg–Zn–Zr processed by spray atomization and deposition, 119
Spray atomization
precipitation and excess solid solubility in Mg–Al–Zr and Mg–Zn–Zr processed by spray atomization and deposition, 119
Steel
characterization of small crack growth in 12% CrMoV steel under high temperature, low cycle fatigue conditions, 89
fracture toughness characterization of a weldment in a microalloyed steel using resistance curves, 153
morphological and compositional changes of the carbides in Cr–Mo–V ferritic steel, 203
on the tempered martensite embrittlement in AISI 4140 low alloy steel, L1
Strain
orientation splitting of cube-oriented face-centred cubic crystals in plane strain compression, 245
the effects of temperature and strain rate on extended ductility of aluminum, 97
Sulphur
slip on {111} planes in lead sulphide, 77

Tellurium
identification of amorphous zones in the GeTeSb system, 273
Texture analysis
operational texture analysis, 1
Titanium
atomic ordering in Ti–V–Al shape memory alloys, 237
yielding and work hardening behaviour of titanium aluminides at different temperatures, 49
Transmission electron microscopy
high temperature transmission electron microscopy and X-ray diffraction studies of twinning and the phase transition at 145 °C in $LaGaO_3$, 13
Tungsten
structure of martensite in Co–W alloys, 267

Vanadium
atomic ordering in Ti–V–Al shape memory alloys, 237
characterization of small crack growth in 12% CrMoV steel under high temperature, low cycle fatigue conditions, 89

Weld metals
the effect of ageing and creep on the impact properties of type 316 weld metals, L1
Weldment
fracture toughness characterization of a weldment in a microalloyed steel using resistance curves, 153
Wetting
wetting characteristics and interfacial reaction of liquid aluminium on hot-pressed boron nitride substrate, 277

Work hardening
yielding and work hardening behaviour of titanium aluminides at different temperatures, 49

X-ray diffraction
high temperature transmission electron microscopy and X-ray diffraction studies of twinning and the phase transition at 145 °C in $LaGaO_3$, 13

Yielding
yielding and work hardening behaviour of titanium aluminides at different temperatures, 49

Zinc
a differential scanning calorimetry investigation of the effects of zinc and copper on solid state reactions in Al–Zn–Mg–Cu alloys, 135
